

Fire Suppression Phase 3

We appreciate your patience as we finalize this important project that will improve water pressure and install new fire hydrants in your community. Completion of the Fire Suppression Project will require temporary lane closures to allow the new waterlines to connect to the City of Naples main water line.

Now that the new waterlines within the neighborhood have been installed, final connection of the new waterlines to the existing main water line is required. The main water line is located beneath Bayshore Drive. To safely make the new connection, temporary lane closures are required. Lane Closures will begin on May 10, 2021 at approximately 10:00 a.m. and is estimated to be completed within 14 to 18 days. Detour signs will be posted.

This connection will be completed in two phases: Phase 1 will impact Coco Avenue and Bayshore Drive and Phase 2 will impact Areca Avenue and Bayshore Drive. Each phase will take approximately 7 days and will shut down the street to local traffic.

Phase 1 – Starting May 10th crews will be working in the north bound Lanes of Bayshore Drive at the intersection of Coco Avenue. Coco Avenue residents or visitors will need to use Areca Avenue to gain access to Coco Avenue. Once Phase 1 is completed, the construction team will start Phase 2. Phase 2 – Areca Avenue residents and visitors will use Coco Avenue to access Areca Avenue. Exact date of Phase 2 commencement will be announced.

As some point during the 14-18 days of construction, the contractor will need to shut the water off to make the final connection. The City of Naples Water Department will notify the residents that are directly impacted by the water shut off. Those residents directly impacted will receive a notice a minimum of 48 hours prior to the shut off.

Please note the construction team will be working diligently to complete the connection as quickly and safely as possible.

The construction team has notified all the necessary departments, Collier County Road Maintenance, Naples Fire Department, Waste Management and USPS office.
